FALCON400

Micro Hardness Tester | Vickers, Knoop, Brinell

MANUAL / SEMI - FULLY AUTOMATED

FALCON 400

Traditional technology reinvented...

The FALCON 400 improves on the conventional hardness testing methods by focusing on elimination of user influence on the test results. The advanced force sensor technology utilizes an electronically controlled loadcell closed loop system with force feedback to achieve absolute accuracy, reliability and repeatability, on all of the forces used for a testing.

The innovative software functions of I-Touch™ workflow control, allows file storage, test program setting and storing, limit settings, conversions to other hardness scales, system setup and convex and concave sample test settings that contribute to the exceptional repeatability and reproducibility of test results.

A FORCE RANGE, THAT SETS NEW STANDARDS!

1gf	5gf	2kgf		FALCON 401	31.25kgf

HIGHLIGHTS

- 1 Multi Load Cell, Closed Loop force application system, error <0.5%
- 6-position collision protected turret, 2 indenter positions; 4 LWD objectives positions
- 3 Analogue or electronic digital eyepiece view via eyepiece and camera simultaneously
- 4 Full color industrial 6.5" touch screen interface with I-Touch firmware
- 5 Powerful embedded electronic system
- 5 Mega pixels, Full HD+, integrated TTL camera system (optional)
 IMPRESSIONS XT indent evaluation and machine automation software,
- 4 different packages (optional)
- 8 Large CNC XY-stage (optional)
- Top-class replaceable body parts, shock proof ABS covers

Unique machine structure

Rigidity and perpendicular indenter positioning are crucial to obtain Vickers indents with a perfect geometry. With a workpiece accommodation of 150 mm x 170 mm the FALCON 400 can be routinely used to conduct common advanced testing tasks.

TECHNOLOGY

Above the current...

1 6 POSITION PRECISION TURRET

The 6 position turret is supplied as a standard feature on all 400 models and allows to install indenters for Vickers, Knoop and Brinell (balls 1mm & 2,5mm) testing. The precision mechanics of the motorized turret permit super-fast and quiet positioning. Switching between indenter and objective is part of the automated test cycle. The turret offers up to 6 positions, with maximum 2 indenters, and 4 objective positions allowing you to fit all the magnification power for your application.

2 ANALOGUE OR DIGITAL EYEPIECE AND BUILT-IN CAMERA

The FALCON 400 can be equipped with a digital eyepiece which can be replaced easily by an analogue eyepiece for educational purposes. An installation of both eyepieces is also possible.

Camera for On SCREEN measurements in combination with the optional IMP IMPRESSIONS™ software system. By accommodating the camera inside the head cover, it is protected against dirt and accidental damage or misalignment.

3 COLLISION DETECTION

To avoid any collision between the work piece and the turret, the turret has an overload protection. So neither the tester nor the workpiece are exposed to any damage.

4 MANUAL AND MOTORIZED XY-STAGES

The FALCON 400 is equipped with an adjustable manual stage that can carry up to 60kg or 100kg load, perfectly fitted for quick and easy single test. Optionally the FALCON allows to expand to a wide choice of motorized XY-stages. The IMPRESSIONS™ tester control and workflow software has many advanced positioning functions, from single indent to advanced pattern testing. The onboard controller allows up to 3 axis CNC work piece positioning.

6.5" FULL COLOUR HD TOUCH SCREEN, I-TOUCH

All machine control and process workflow can easily be operated from the 6.5" full-color HD touch screen. Mounted on a table stand, the display with smart Graphical User Interface (GUI), flexible in use, can be located either on the right or left of the machine for right or left handed operators. Due to its tilt function the display can be set up in such a way that either in standing or sitting position, the viewing and operating angle is always ideal.

6 SHOCK RESISTANT ABS MACHINE COVERS

A rock solid frame structure, that can withstand the harshest environment, is covered by shock and damage proof ABS covers. The covers avoid damage to the machines high tech interior and stay in a good condition over the years to come. No dents or paint damage from fallen work pieces. Replacement of the covers, if required at all, is easy and economic.

Innovative software functions

The I-Touch™ software provides clever multi-function keys for testing, set-up, storing and uploading of test programs, statistic control and more, making tester operation as easy as it can be. Data export, single or batch readings, with a single press on a button, or just fully automatic after measurement can be stored on a USB stick or transfer by cable to a PC to be imported or evaluated in EXCEL.

Further advanced features include extended statistics, shape correction for convex, concave or ball shaped specimens, hardness conversion to Rockwell, Brinell or Tensile strength according to ASTM E140 and ISO 18625 with different material tables.

There is a table top panel with a adjustable viewing angle or an integrated version imbedded in the testers frame. In all cases, the panel is mounted in a solid robust aluminum frame.

OPERATING COMFORT WITH I-TOUCH

INNOVATIVE SOFTWARE FUNCTIONS

UNMISTAKEN TURRET POSITION

AUTOMATIC IMAGE

EVALUATION

1 AUTOMATIC MEASUREMENT

Manual positioning of filar lines is no longer required. IMPRESSIONS™ refined measurement algorithms detect indents even on very poor or scratched surfaces and measure the relevant indent dimensions according to standards. Stay in control by switching to manual measure mode and have the option of adjusting measurements by touching the screen or using the mouse. Filar lines can be colored to give the best contrast against the specimen's surface. To assure that measurements meet relevant standards on symmetry, enable the automatic indent check. All hardness values can be converted to other scales according to ISO 18265, ISO 50150, ASTM E140.

Evaluate whatever you want, -- because what gets measured, gets produced...

2 ILLUMINATION SETTINGS

IMPRESSIONS™ software automatic illumination system adapts to the correct illumination regardless of the sample surface quality, wherever on the sample, independent from material (steel, carbide, coated or ceramic). Contrast, Brightness and program, can be set automatically for each measurement or controlled manually. Sharpness can be stored with the pre-determined test.

Too bright

Too dark

Irregular surface

Regular surface

Poor surface

3 REFINED IMAGE DETECTION

Complex, refined algorithms ensure reproducible measurements on different materials and even on scratched and damaged surfaces.

AUTOMATIC INDENT

Indent evaluation software, also referred to as "tester automation", often comes with a high level of complexity, both in setup and in operation. Breaking these rules, IMPRESSIONS XT™ (optional) focuses on fast and simple operation, for a less experienced operator.

A very easy to learn, work flow process but with functionality expected by expert users. IMPRESSIONS™ is optimized for evaluating Macro-Vickers, Micro-Vickers, Knoop & Brinell indents according to ISO, ASTM and JIS standards.

SELECT YOUR INDENT EVALUATION PACKAGE:

1 STANDARD (IMP-PACK2)

"IMPRESSIONS" Software for manual and automatic measurement of Vickers / Knoop & Brinell indents, indent zoom function, automatic illumination adjustment.

Package Includes:

*High performance system controller with USB, HDMI, RS-232, WLAN, LAN connectivity. Industrial DVI/HDMI capacitive touch screen, with wireless keyboard and mouse, 5 Mpx HD industrial CCD camera, cable set. Software features: Full tester configuration & control system, automatic brightness & contrast setting, automatic measurement of Vickers, Knoop and Brinell indents, manual CHD, SHD, NHD testing procedure, Kic measurement, set up and storing of test programs, set up and storing of tester configuration, limits (go/no go), diagrams, advanced report generator with editor.

NO INSTALLATION, NO ADDITIONAL PC REQUIRED!"

2 ADVANCED (IMP-PACK3 & IMP-PACK4)

As STANDARD package but offers two options:

IMP-3 has one digital micrometre X-axis that transfers the position of the stage to IMPRESSIONS™, whereas IMP-4 has two digital micrometres that transfer the position of the stage to IMPRESSIONS™.

3 PREMIUM (IMP-PACK5)

As STANDARD package but offers:

XY-Motorized CNC stage, 237x188mm, 100x100mm travel, loads up to 100kg, repeatability 0,003mm, with mounting holes for stage accessories. 3-axis CNC stage controller.
Fully automatic CHD, SHD, NHD testing procedure, advanced test pattern editor, click and go. (Optional: surface overview camera)
NO INSTALLATION, NO ADDITIONAL PC REQUIRED!"

INDENT EVALUATION SOFTWARE

CHD, SHD, NHD

How do you increase throughput in your lab? Make the most common testing design as easy to set up as it is to perform automatically and still adhere to the applicable standards. CHD/SHD/NHD testing can be started directly from the surface view or from the overview. Additional core points of hardness can be defined separately for NHD measurements.

The distances of test points are automatically set to a minimum distance, following the standard, to assure correct testing is conducted. Time saving test mode "complete all indentations – then evaluate" and "auto-stop" to complete test series as soon as the lower hardness limit has been reached. Report Generator is enhanced with reporting features for this application.

EDGE DETECTION

Technology that automatically or at a mouse click recognizes the edge of your sample. This helps to determine and fix the desired starting position for CHD or other pattern testing jobs.

3 AUTOMATIC CONTOUR SCANNING

This application scans the entire outline (or partial) area of a sample. The function can be used with an objective by using the overview zoom camera for high speed scanning. The system scans the entire outline defined and stores all relevant data in the test program.

Subsequently, a limitless number of test points can be inserted into the scanned image, or be set at selected distances (offset), relative to the edge. This advanced feature enables the hardness testing procedure to be performed atomically. An excellent feature to combine with 2D or 3D hardness mapping, also known as "plane hardness chart".

4 SNAPSHOT FUNCTION

This handy function in IMPRESSIONS™ allows you to make screen captures of the viewing area by way of objective view and/or Overview camera. It gives the opportunity to store such images with comments or to paste them into the report generator for further processing.

REPORT GENERATOR

Imagine having a report created for you that includes: Your company name, address, contact information, labeled results related to patterns or sequential, pictures of your optical measurements, stitched images, notes section for each result or pictures, rendition of the pattern performed, overview picture of your pattern on your sample, full statistics, summary of your results, go no-go results, Pass or fail... all that information or having the ability to only have what you need reported, we call this our Report Configurator. You decide how much or how little you report by PDF or laser printer. We even keep it simple by choosing export to CSV file, to a thumb drive or network file location. Data management at its best!

5 PATTERN TESTING

The IMPRESSIONS™ pattern editor allows the user to create any number of test patterns with a large number of variable settings. Create test patterns with great precision and freedom. Verify the settings in the preview mode. Drag & drop patterns from one test sample to another sample. Live vision technique over zoom overview camera, no image stitching required.

Combine different patterns and even different test forces in one program, and run them fully automatically. All test points can be identified individually or to customer specifications. The label is shown in the test result list and in the test results overview and in the results print out. An important function for sample analyses at the end of a test and in the future for review of previous tests.

Yes, we can...

7 Kic CRACK MEASUREMENT

For those requiring more in depth knowledge on materials behavior, wishing to study material fracture and fatigue, crack growth can be predicted and measured by using the Kic application. The software supports Kic crack detection under load with customized Kic result reporting. By way of one or both methods, Palmqvist or Median / Radial, fracture toughness is now a repeatable and reproducible test across multiple operators.

8 USER DEFINED PROGRAMS

For repeating jobs, IMPRESSIONS™ utilizes the option of setting up and storing custom test programs. For each task, a "job" can be created. All application specific parameters, like hardness scale, force, dwell-time, pattern, conversion and the report template are stored in the same program.

LIMITLESS POSSIBILITIES

The FALCON 400 is routinely used for testing materials, components or parts in the aerospace and automotive industry, laboratories for sample evalution or to conduct advanced testing tasks. The shock and damage proof covers protect are high-tech interior of this unique Micro-Macro Vickers machine.

SUPPORT YOUR **BEST TESTING RESULTS**

With our rigid designed Bench stands

Rock solid bench stands

100% retractable drawer, bearing guidance, max 100kg load. Rubber anti slip bottom

Lockable cabinet, 300mm high

Adjustable feet, (+/- 50mm height adjustable to

reach ergonomic working position) Made of corrosion resistant zinc plated steel with

RAL powder coating

Carrying capacity of 400kg

Top surface made of 50mm Plywood with 1.5mm chemical resistant plastic plating,

edges made of shock resistant 3mm ABS side liner Industrial quality, for workshop or laboratory

Designed for hardness testing instruments, painted in INNOVATEST® RAL colors matching our testers.

SOFTWARE PACKS

GUI: Full tester & configuration control, 3 simultaneous conversions to other hardness scales, limit settings, color indication for measuring results, results list with highlighted in and out of limit values, graphics engine to display turret positions and indenter positions, test force progress bar.		
Full tester configuration & control system, automatic brightness & contrast setting, automatic measurement of Vickers, Knoop and Brinell indents, manual CHD, SHD, NHD testing procedure, Kic measurement, set up and storing of test programs, set up and storing of tester configuration, limits (go/no go), diagrams, advanced report generator with editor. NO INSTALLATION, NO ADDITIONAL PC REQUIRED!	400/IMP-PACK2	
Full tester configuration & control system, automatic brightness & contrast setting, automatic measurement of Vickers, Knoop and Brinell indents, manual CHD, SHD, NHD testing procedure, Kic measurement, set up and storing of test programs, set up and storing of tester configuration, limits (go/no go), diagrams, advanced report generator with editor. NO INSTALLATION, NO ADDITIONAL PC REQUIRED!	400/IMP-PACK3	
Full tester configuration & control system, automatic brightness & contrast setting, automatic measurement of Vickers, Knoop and Brinell indents, manual CHD, SHD, NHD testing procedure, Kic measurement, set up and storing of test programs, set up and storing of tester configuration, limits (go/no go), diagrams, advanced report generator with editor. NO INSTALLATION, NO ADDITIONAL PC REQUIRED!	400/IMP-PACK4	
Full tester configuration & control system, automatic brightness & contrast setting, automatic measurement of Vickers, Knoop and Brinell indents, Kic measurement, set up and storing of test programs, set up and storing of tester configuration, limits (go/no go), diagrams, advanced report generator with editor. XY-Motorized CNC stage, 237x188mm, 100x100mm travel, loads up to 100kg, repeatability 0,003mm, with mounting holes for stage accessories. 3-axis CNC stage controller. Fully automatic CHD, SHD, NHD testing procedure, advanced test pattern editor, click and go. (Optional: surface overview camera) NO INSTALLATION, NO ADDITIONAL PC REQUIRED!	400/IMP-PACK5	

SOFTWARE

Additional Software	Advanced 3 axis coordinate & free style indent pattern configurator, for motorized stage only	UN-TESTPAT01	* IMP-PACK5
	Advanced 3 axis coordinate & free style indent pattern configurator, + CHD, SHD, NHD and edge detection, (supports manual & digital micrometer stages only)	UN-TESTPAT02	* IMP-PACK2,3,4
	KiC crack detection under load. Palmqvist & Median / Radial fracture toughness	UN-CRKPAR	* IMP-PACK 2, 3, 4, 5
	Automatic Contour scanning	UN-CSCAN	* IMP-PACK5
	Drawing and measuring (distance & angles) application	UN-DRMEAS	
	Automatic edge detection	UN-EDGEDTC	* IMP-PACK5
	ISO-2702 tap screw thread measurement	UN-ISO2702	* IMP-PACK5
	User level management	UN-LEVMAN	STANDARD
	CHD, SHD, NHD configurator & graphic interface for analogue and digital micro meter stage only (not including full pattern editor)	UN-MCHD	* IMP-PACK2,3,4
	CHD, SHD, NHD configurator & graphic interface requires: indent pattern configurator (TESTPAT01)	UN-PATCHD	* IMP-PACK 5
	Q-DAS Certified connectivity protocol	UN-QDAS	
Connectivity Plus	Blue Tooth connectivity	UN-BTADAPT	
	Wireless system Keyboard & wireless mouse	UN-SKBSET

TEST FORCE

CONVERSIONS

Force application	Multi-load cell, closed loop, force feedback system
Test forces	1gf – 31.25kgf
Force range per model	FALCON 401 5gf – 2kgf
	FALCON 402 1gf - 2kgf
	FALCON 403 10gf - 10kgf
	FALCON 404 1gf - 10kgf
	FALCON 407 10gf - 31.25kgf
	FALCON 408 1gf - 31.25kgf
Test force tolerance	< 0.5% for all test forces
Dwell time settings	Default 10 seconds, user defined.

Conversion to other hardness scales according to ASTM E140, ISO 18265, GB/T 1172

TURRET

Motorized turret	Ultra-fast, 6 position turret, 2 indenter positions, 4 objective positions
Objectives	Long working distance 5x, 10x, 20x, 50x,100x
Indenters	Certified indenters (ISO/ASTM) available at choice
Eyepiece	Analogue eyepiece with 15x magnification
	Electronic digital eyepiece with 15x magnification
Camera	5 Mpx optical zoom system (optional)

SYSTEM

Electronic system	High performance embedded electronics system running i-Touch firmware
CNC support	CNC controller (for motorized stages) or stage accessories (IMP Pack 5)
Screen(s)	6.5" display, 15" LCD screen (optional)
Display resolution	0.1 HV, HK, 0.5 HB
Statistics	Total test, max, min, average, range, standard deviation, All in real time after each test
Hardness conversion	Rockwell, Rockwell Superficial, Vickers, Brinell, Knoop, Leeb & Tensile
Software	i-Touch firmware, work flow system & tester control
Data output	USB
Connectivity	USB-2
Printer	A4, A3 full color laser printer (optional)

GENERAL

Machine dimension	525 mm x 323 mm x 688 mm
Machine weight	75 kg
Power supply	100VAC to 240VAC, 50/60Hz, single phase
Operating temperature	10°C to 35°C, non-condensing
Power consumption	75W
Humidity	10% to 90%, non-condensing

TECHNICAL DRAWINGS

170 345

All dimensions in these drawings are in mm, approximate. Working heights and or workpiece accommodation varies depending on the stages and stage accessories used.

Please contact our sales department for more details.

OTHER MODELS IN THE FALCON RANGE

FALCON 450

Load Cell, closed loop Macro/Micro Vickers, Knoop & Brinell Hardness tester With Z-axis handwheel See brochure B18F450/XX

FALCON 500

Multi Load Cell, Closed loop Fully automatic, free to configureMicro/Macro Vickers, Knoop & Brinell Hardness testers. With ball bearing motorized Z-axis See brochure B18F500/XX

FALCON 600

Multi Load Cell, Closed loop Fully automatic, free to configure Micro/Macro Vickers, Knoop & Brinell Hardness testers. With ball bearing motorized Z-axis See brochure B18F600/XX

FALCON 5000

Multi Load Cell, Closed loop Fully automatic, 8 position turret, laser postioning. Micro/Macro Vickers, Knoop & Brinell Hardness testers. Descending test head, fixed work piece position See brochure B18F5000/XX

FALCON 5003XL

Multi Load Cell, Closed loop Fully automatic, 8 position turret, laser postioning. Micro/Macro Vickers, Knoop & Brinell Hardness testers Descending test head, fixed work piece position See brochure B18F5003XL/XX Changes in products and/ or product specifications can emerge due to new technologies and continuous development.

We reserve the right to change or modify specifications of the products without prior notice. We recommend you to contact our sales office for up-to-date information.
